Mother's Aspirations

Mother wants all her children to live in peace and comfort. Unfortunately, the evils of racial discrimination, economic inequalities, communal bias, class distinctions, linguistic fanaticism and social instability plague the world. This is the consequence of the decline in the spiritual value and the emergence of materialism. To overcome these problems, the "Mother" wants each of his devotees to help the oppressed and the underprivileged. The first step in this direction was formation of The Adhiparasakthi Charitable Medical Educational and Cultural Trust (ACMEC). The Trust was created in 1978 with the prime objective to spread spirituality and render social and community services irrespective of caste, creed, community and religion.
